

Status of the GLAST Science Support Center

David Band – Science Lead, SSC

Jay Norris – SSC Manager

SSC Within Ground System

Accomplishments--1

- **Roles and responsibilities defined at the SSC-IOC interface:**
 - **SSC and IOCs are partners in defining suite of science tools, establishing standards, and evaluating completed tools**
 - **SSC scientists participate in developing tools**
 - **Prerogatives of instrument team members respected**
 - **SSC and IOCs collaborate on representation of instrument response functions**
 - **Instrument teams determine calibration procedures**
 - **Instrument teams implement response functions**
 - **SSC has a role in designing and testing Level 1 pipeline**
 - **SSC has a backup Level 1 pipeline for use in an emergency**

Accomplishments--2

- **Current Staffing – Manager, Science Lead, 2 scientists, scientific programmer, webmaster, administrative assistant**
- **Upcoming interviews with candidates for scientist positions**
- **CGRO SSC has hired programmers for CGRO FTOOLS. These FTOOLS may be applicable to GLAST data, and programmers may transfer to the GLAST SSC in ~a year.**
- **Documents**
 - **PMDP revised**
 - **SSC Functional Requirements Document revised**
 - **Report of GLAST Data Products Working Group (with 1st pass at ICDS)**

SSC Staffing Plan

- **Staff consists of scientists, programmers, support staff**
 - **Manager (J. Norris)** **C.S. Oversight: Budget, Staffing**
 - **Science Lead (D. Band)** **Scientific direction,
Development of Science Tools**
 - **LAT I.S. (T. Kotani)** **Liason with LAT team, LAT expert**
 - **GBM I.S.** **Liason with GBM team, GBM expert**
 - **Calibrations Scientist** **Calibrations Expert**
 - **Archive Scientist (D. Davis)** **Design, Implementation of Archive**
 - **User Support Scientist** **Guest Investigator Support**
 - **SW Lead (B. Schaefer)** **Design of Analysis Tools, Pipelining
+ 5 Scientific Programmers**
 - **Webmaster (J.D. Myers)** **Website**
 - **Admin. (S. Barnes)** **Administrative Support**
-
-

Master Plan--Mission

- **FY2002– Staffing; Documents; Design science tools, database & pipeline**
 - **FY2003– Develop science tools, database & pipeline**
 - **FY2004 – Mission planning tools; Science tools; Database construction**
 - **FY2005 – 1st NRA; Complete operations system: mission planning, databases; End-to-end tests of ground system**
 - **FY2006 – Launch; Support checkout; Support Phase 1; 2nd NRA**
 - **Subsequent FYs – Support Phase 2 (e.g., timeline, conferences); Support G1 program; New NRAs**
 - **Phaseout – Transfer databases, software to HEASARC**
-
-

Plan--FY02

- **Staffing:**
 - Hire calibration, GBM scientists. Interviews next week, 2 next month.
 - **Documents**
 - Finish & sign off on PDMP
 - Finish & sign off on SSC Functional Requirements Document
 - Contribute to other documents (e.g., Operations Plan)
 - **Databases**
 - Study and model organization of the photon database, e.g., use HEALpix? Other schemes?
 - Bob Schaefer is taking over from Cathie Meetre
 - **Response functions**
 - How to use CALDB in GLAST framework
 - **Level 1 Pipeline**
 - Definition of end-to-end processes
-
-

Plan--FY02, Continued

- **Level 2 Science Tools**
 - **Set up SSC-IOC software working groups**
 - **Develop list of tools for investigators**
 - **Establish requirements, deadlines, etc., for these tools**
 - **Develop standards based on HEASARC standards**
 - **FITS I/O**
 - **Platforms supported**
 - **Computer languages**
 - **User interfaces**
 - **Multimission approach**
 - **SSC scientists part of development groups, begin defining the analysis issues, developing algorithms**
